

DRIVER PARTITION FOR MAXIMUM SAFETY

(Aerosol particles and water droplets will stay within separated areas)

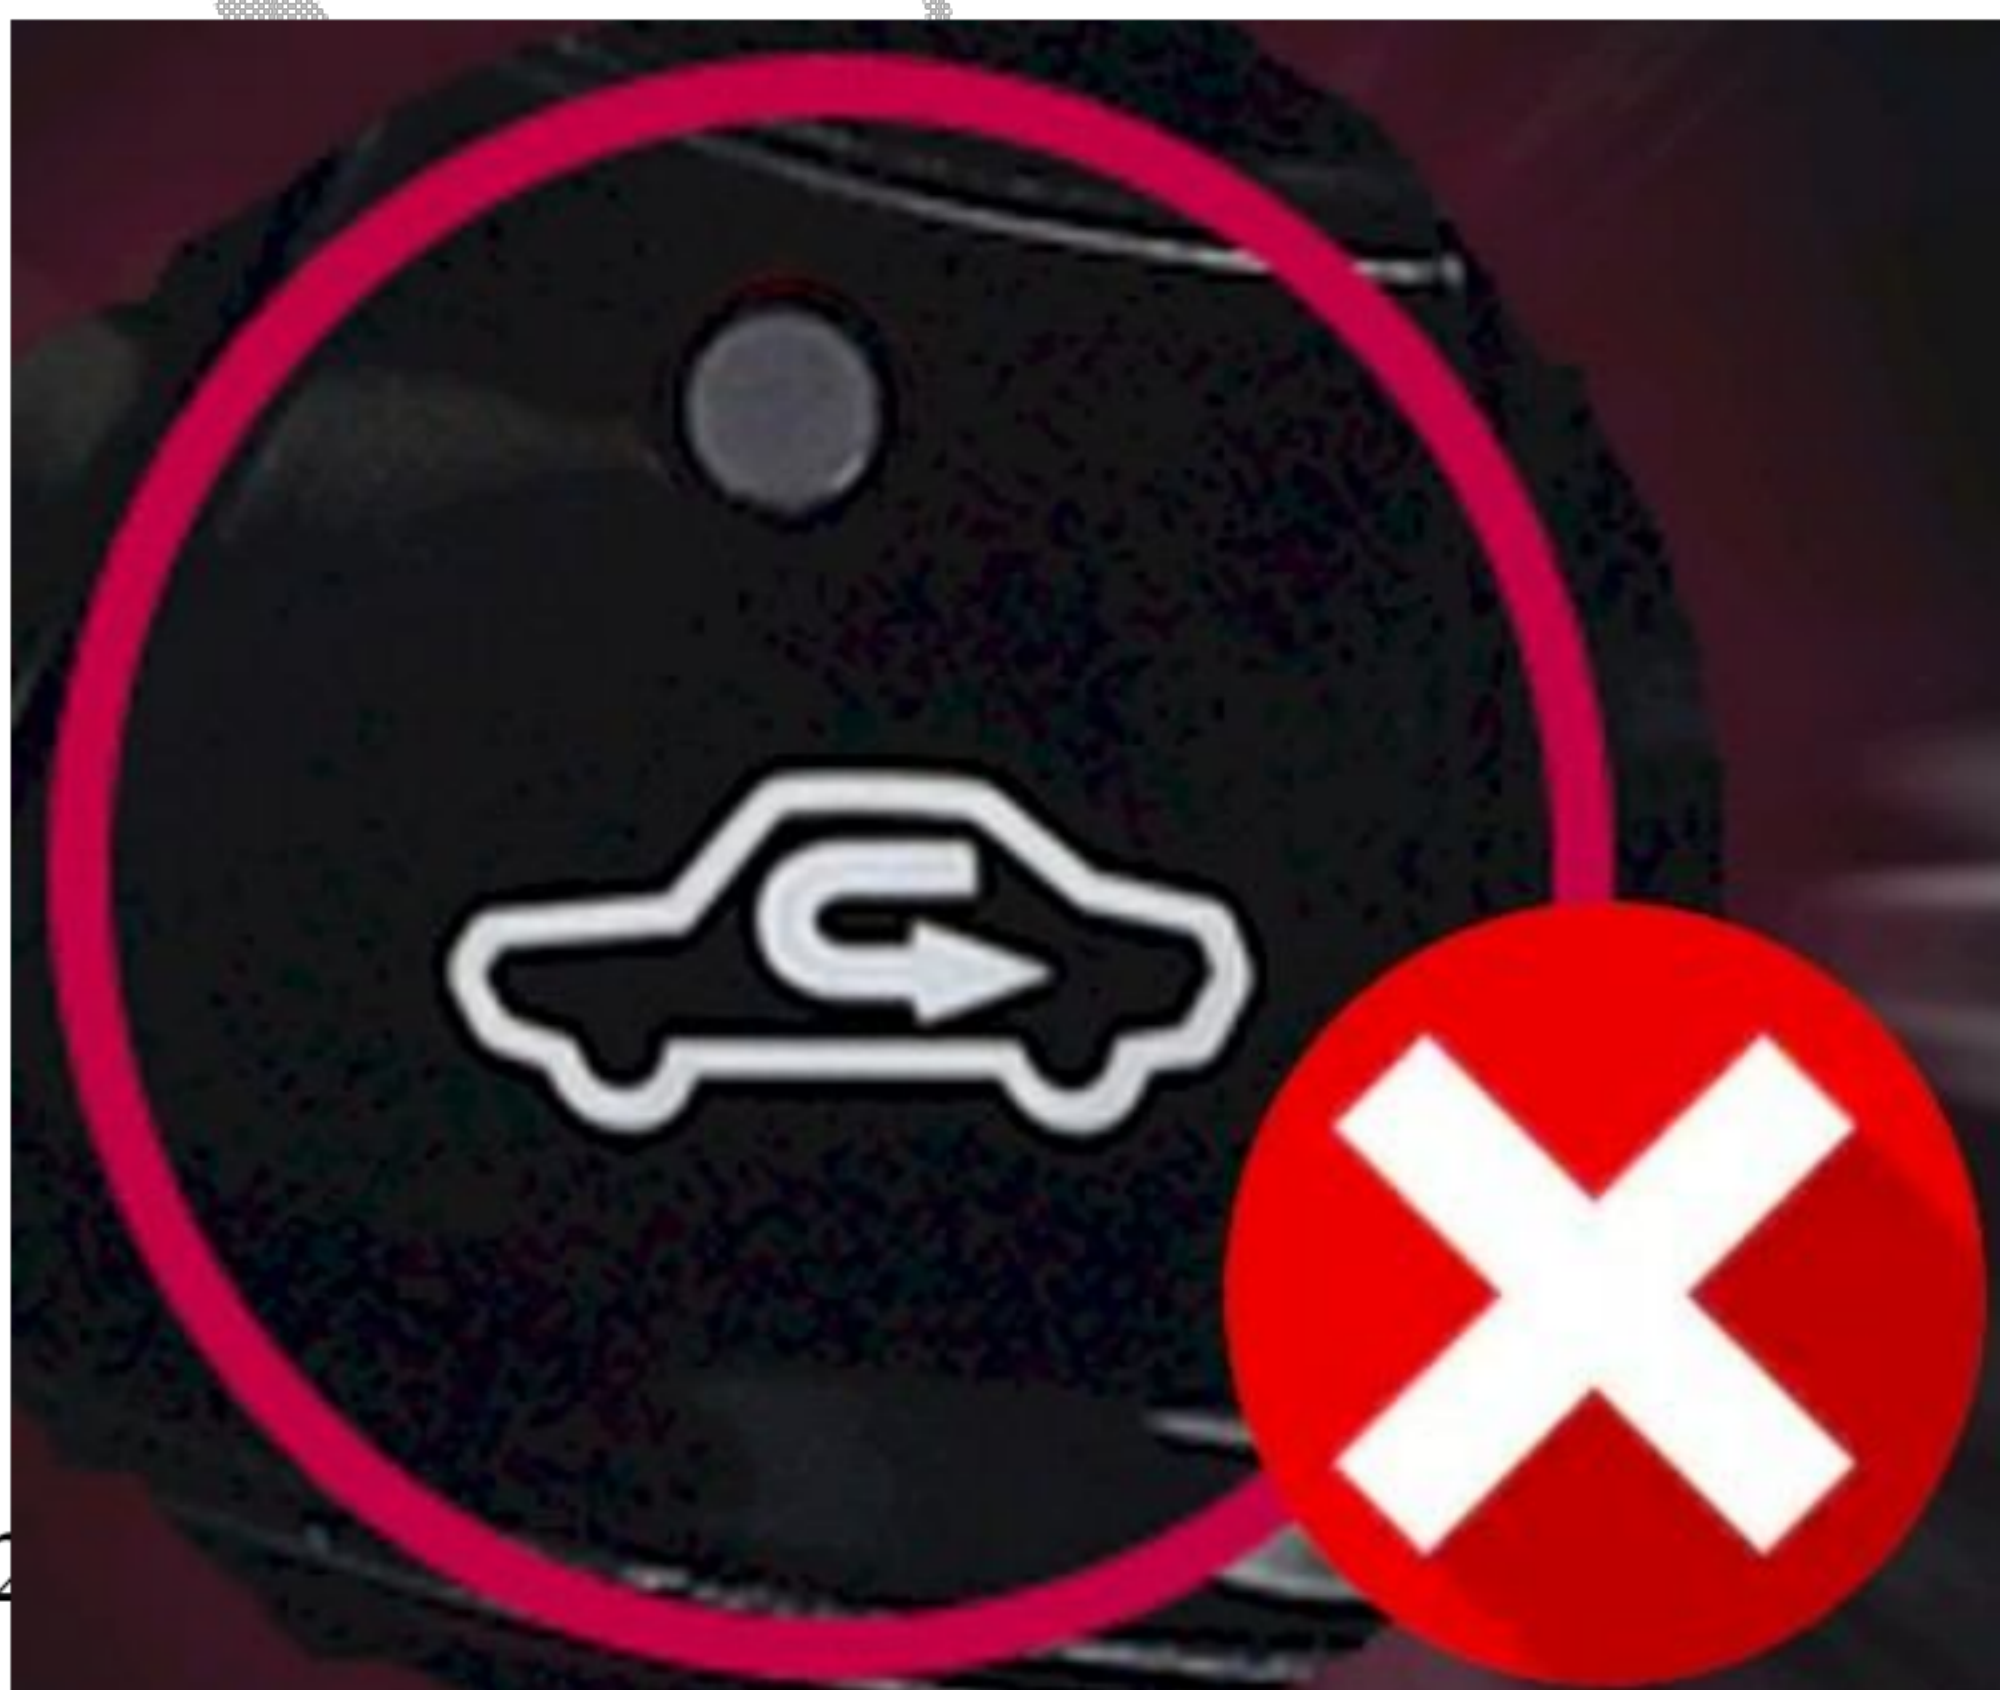

Here at USCapitolLimo, your safety is our primary concern and to that end we have designed our own, patent pending partition which safely cuts the air circulation ties between front and rear passenger area, sealing off all aerosol virus/bacteria contaminants through any potential air flow gaps and channels.

Our partition also provides better climate control and reduces noise coming from the engine areas towards rear cabin.

AIR CIRCULATION BUTTON WILL ALWAYS STAY IN THE OFF POSITION

ALLOWING ONLY FRESH OUTSIDE AIR FLOW INTO THE CABIN

Drivers are instructed never to turn on the air circulator while driving with a passenger in the car.
